The laboratory grown diamond described in this report has been graded, tested, analyzed, examined and/or inscribed by International Gernological Institute (IGI). Laboratory grown diamonds are diamond crystais created by scientific means and representing essentially all physical, chemical and optical characteristics of natural diamonds. IGI employs and utilizes those techniques and equipment currently available to IGI including without limitations: JoarnandAview, DiamondSure, FIIR spetroscopy, UV VIS NIR absorption spectrometer. EDXRF spectroscopy, PL (RAMAN) spectrometers.

Om Security features included in this document are hologram, watermarked paper and additional features not listed, that, as a composite, exceed industry security standards.
