This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed<sup>®</sup> by international Geromlogical Initiute (GD). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are shypically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) grawth processes and may include post growth modifications to change the color. (GI utilizes the most advanced techniques and equipment currently available including. Dinocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, UV-nis SNIR, UV-nis SNIR, Distributor techniques excitation avaelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation nor approvisal and by making the report GI does not agree to purchase or replace the article.
