This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by international Gemological Institute (GR). A LGD has essentially the chemical, physical and optical properties as a mined damond, with the exception of being man-made (a manufactured product). LGDs are hypically produced by CVD (chemical vapor deposition) or by HFH (high pressure high temperature) growth processes and may include post growth modifications to change the color. (Gi utilizes the most advanced techniques and equipment currently available including, binocular microscopes, admand calor maders, non-contract-optical measuing device, a wide range analytical techniques including FIIIE, UV-VIS-NR, raman spectroscopy, and fluorescence analysis at various excitation avaelengths. This Report includes advanced security features. The Report is neither a guarantee, valuation nor appraisal and by making the report (Gi does not agree to purchase or replace the article.
