 This Laboratory grown diamond was created by high pressure high temperature process (HPHT) Type II
 LABGROWN IGI LG407972690

The symbols do not usually reflect the size of the characteristics.
 Red symbols indicate internal characteristics.
 Green symbols indicate external characteristics.

insignificant external details, visible under high magnification only, are not shown

0^{mm} Security features included in this document are hologram, watermarked paper and additional features not listed, that, as a composite, exceed industry security standards.

The laboratory grown diamond described in this report has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). Laboratory grown diamonds are diamond crystals created by scientific means and representing essentially all physical, chemical and optical characteristics of natural diamonds. IGI employs and utilizes those techniques and equipment currently available to IGI including without limitations: DiamondView, DiamondSure, FTIR spectroscopy, UV VIS NIR absorption spectrometer, EDXRF spectroscopy, PL (RAMAN) spectrometers. This report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION NOR APPRAISAL OF THE LABORATORY GROWN DIAMOND DESCRIBED HEREIN
This report is subject to the terms and conditions set forth above and on reverse.
