The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IG.1). A laboratory grown diamonal is one that has essentially the same chemical, physical and optical properties as a mined aliamond, with the exception of being grown by man (a manufactured product). I.G.1. employs and utilizes those techniques and equipment currently available to I.G.1, including, without limitation. 10X magnification, corrected hipplet laughe, binecular microscopy inaffer and viscous passion stress, non-confact-optical positions.
