The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGL). A laboratory grown diamond is one that has essentially the same chemical, physi-cal and optical properties as a mined alamond, with the exception of being grown by man (a manufactured product). (E.I. employs and utilizes those techniques and equip-ment currently available to IGL, including, without limitation. 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contract-optical measuring devices. Diamond Sure¹⁹, Diamond View¹⁹, Spectraphotometer and such other vanced security features. A duty accredited gemologist of jeweler can advice you with re-spect to the importance of and interrelationship between cut, color, clarity and carart weight.
