GRADING SCALES

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by international Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physi-cal and optical properties as a mined aliamond, with the exception of being grown by man (a manufactured product). (G.I. employs and utilizes those techniques and equip-ment currently available to I.G.I., including, without limitation, 10X magnification, corrected triplet louge, binocular microscope, master color comparison stones, non-contract-optical mistimments and/or processes as deemed appropriate by O.G.I. This Report includes and specific and interredited employed in the relation of the site of the spect to the importance of and interrelationship between cut, color, clarity and carat
