GRADING SCALES

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physi-cal and optical properties as a mined alamond, with the exception of being grown by man (a manufactured product). (L3. employs and utilizes those techniques and equip-ment currently available to I.G.I. including, without limitation, 10X magnification, corrected implet louge, binocular microscope, master color companison stones. Non-contract-optical measuring devices, Diamond Sure¹⁹, Diamond View¹⁹, Spectraphotometer and such other vanced security features. A duty accredited gemologist of geweler can advise you with re-spect to the importance of and interrelationship between cut, color, clarity and carat
