GRADING SCALES

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGLI). A laboratory grown diamond is one that has essentially the same chemical, physi-cal and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). (IGL employs and utilizes those techniques and equip-ment currently available to IcL, including, without limitation, 10X magnification, corrected triplet loupe, binocular increascope, master color companison stones, non-contact-optical measuring devices.
