This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (IGI). A LGD has essentially the chemical, physical and optical properties b) measure diamond, with the exception of being man-made (any nord terminal, product CLGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. ICI utilizes the most advanced techniques and the modifications to change the color. ICI utilizes the most advanced techniques and the modifications to change the color.
