The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGLI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGL employs and utilizes those techniques and equipment currently available to IGL, including, without limitation. 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-confact-optical

weight.
