This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesracited® by International Gemological Institute (LGD). A LGD has assentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vipor deposition) or by IHPIT (high pressure high temperature) growth processes and may include post growth modifications to change the color. Glutillizes the most advanced techniques and equipment currently available including, binocular mitoriscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FITE, IU-V-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor approxisal and by making the report (ISI does not gree to auctive, secretary extreme processors).
