EDUCATIONAL AND SCIENTIFIC LABORATORY FOR THE IDENTIFICATION AND GRADING OF DIAMONDS AND COLORED STONES

GRADING SCALES

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physi-cal and optical properties as a mined alamond, with the exception of being grown by man (a manufactured product). (L3. employs and utilizes those techniques and equip-ment currently available to I.G.I., including, without limitation, 10X magnification, corrected triplet louge, binocular microscope, master color companison stones. Non-contact-optical measuring devices, Diamond Sure¹⁹, Diamond View¹⁹, Spectraphotometer and such other vanced security features. A duty accredited gemologist of geweler can advise you with re-spect to the importance of and interrelationship between cut, color, clarity and carat
