This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Genodiocal Institute (IGI). A LGD has sesentially the chemical, physical and optical proprieties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical wayor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. IcI utilizes the most advanced techniques and equipment currently available including, binocutar microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FTIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is celter a guarantee, valuation nor appraisal and by making the report IGI does not agree to purchase or replace the article.
