Comments: This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa.

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (IGI). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGI utilizes temperature) growin processes and may include post growin inductions to change the color, rot unitizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color mosters, non-contact-optical measuring device, a wide range analytical techniques including FIR, U-V-VIS-MIR, roman spectroscopy, and fluorescence analysis at various excitation. wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report IGI does not garee to purchase or replace the article.
