This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (IGI), A LGD has essentially the chemical, physical and optical properties as mined diamond, with the exception of being mam-made (a manufactured product). LGDs are typically produced by CXD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes dogiument currently available including, binocular increascope, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including. FTIR, UX-VIS-NIR, raman spectroscopy, and florerescence analysis at various exclation wavelengths. This Report includes advanced security features. This Report is neither a guarante, valuation nor appraisal and by making the report IGI does not agree to purchase or replace the article.
