This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed[®] by International Gemological Initiute (GA). L4G has essentially the chemical, bytiscial and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPI (high pressure high temperature) growth processes and may include post growth modifications to change the color. [GI utilizes the most advanced techniques and equipment currently available including. Disocular microscopes, alamond color masters, non-contact-ophical measuring device, a wide range analytical techniques including FIIR, UV-UIS-NIR, UV-IN-SINE, runna spectroscopy, and fluorescence analysis at various excitation availangths. This Report Includes advanced security features. This Report is neither a guarantee, valuation or opprivation dby making the report [GI does not age to particulase or replace the articles.
