This Laboratory Grown Diamond was created by Chemical Vapor Deposition

(CVD) growth process. Type IIa

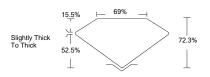

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gennological Institute (GI)a. LLGD has essentially the chemical, physical and optical proprieties as a mined diamond, with the exception of being man-made (a manufactured product). LCD's are typically produced by CDV (chemical ayore deposition) or by HPHT (finity pressure high temperature) growth processes and may include past growth modifications to change the color. Icl utilizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FTIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report in celler a quarantee, valuation nor appraisal and by making the report ICI does not agree to purchase or replace the article.
