This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed's platematical Gemological Institute (GI) A. LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. (GI utilizes the most advanced techniques and equipment currently evailable including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FTIR; UV-VIS-NIR, raman spectroscopy, and fluorescopes analysis at various excitation vavelengths. This Report includes advanced security features. This Company is petitive to provide the process of the report IGI does not agree to purchase
