This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (IGI). A LGD has sesentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HFHT (high pressure high temperature) growth processes and may include post growth modifications to charge the color. If of utilizes the most advanced techniques and may include post growth modifications to charge the color. If of utilizes the most advanced techniques and may include the part of the color of
