This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by international Gemological Institute (IG). A LGD has essentially the chemical, physical and aptical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the coint (IG utilizes the most advanced techniques and equipment currently available including.
