This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (GI). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HFHT (high pressure high temperature) growth processes and may include posts growth modifications to charge the color. GI utilizes the most devanced techniques and may include post growth modifications to charge the color. GI utilizes the most devanced techniques and may include post growth modifications to charge the color. GI utilizes the most advanced techniques and massuring device, a wide range analytical techniques including. FTIR, UV-VIS-MR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report IGI does not agree to purchase or replace the article.
