This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (GN). A LGD has essentially the chemical, physical and optical properties as a mined atomond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by IHPIT (high pressure high temperature) growth processes and may include post growth modifications to change the color. (GI utilizes the most advanced techniques and equipment currently available including, binocular microscopes, including FIIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor approval and by making the report IGI does not agree to purchase or epicace the anticle.
