This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesracited by International Gemological Institut (LGD). A LGD has assentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are hypically produced by CVD (chemical vapor deposition) or by HPIH (high pressure high temperature) growth processes and may include post growth modifications to change the color. Gli utilizes the most advanced techniques and equipment currently available including, binocular mitoracopses, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIRI, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation or caparistical and by making the report (Isi does not gree to purchase or reposite the article.
