This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II		

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (IG). A LGD has essentially the chemical, physical and optical properties as a mined alianond, with the exception of being man-made (a manufactured praduct). LGDs are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. (Gi utilizes the most advanced techniques and equipment currently available including, binocular microscopes, including FTIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelenaths. This Report Includes advanced security features. This Report is nettine a guarantee, valuation

Comments: As Grown - No indication of post-growth treatment.

This Laboratory Grown Diamond was created by High Pressure High

wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuat nor appraisal and by making the report IGI does not agree to purchase or replace the article.
