This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II		

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by international Gemological Institute (IG). A LGD has essentially the chemical, physical and optical properties as a mixed atomond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by IPHI (high pressure high temperature) growth processes and may include post growth modifications to change the color. (Gi utilizes the most advanced techniques and equipment currently available including, binocular microscopes, including FIIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelenaths. This Report Includes advanced secultiv features. This Report is netter a guarantee, valuation

nor appraisal and by making the report IGI does not garee to purchase or replace the article.

Comments: As Grown - No indication of post-growth treatment.
