#### IGI LABORATORY GROWN DIAMOND ID REPORT

04/16/2021

IGI Report Number LG470146940

### ROUND BRILLIANT

#### 5.03 - 5.07 X 3.14 MM

Carat Weight	0.50 CARAT
Color Grade	D
Clarity Grade	SI 2
Cut Grade	EXCELLENT
Polish	EXCELLENT
Symmetry	EXCELLENT
Fluorescence	NONE
Inscription(s)	LABGROWN IGI LG470146940
Comments: As G	rown - No indication

Comments: As Grown - No indication of post-growth treatment. This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II

This Laboratory G	rown Diamond was
created by High P	
Temperature (HPI	HT) growth process.

Type II

This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II This Laboratory Grown Diamond (IGD) described in this Report has been analyzed, graded and Laserscribed<sup>®</sup> by international Gemological Institute (GD). A LGD has assentially the chemical, physical and optical properties or a mined diamond, with the exception of being marm-made (a manufactured product), LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high termocritute) arowth processes and may include post arowth modifications to chance the color. IGI utilizes

Comments: As Grown - No indication of post-growth treatment.

LGDs are typically produced by CVD (chemical vapor deposition) or by HHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. Glutilizes the most advanced techniques and equipment currently available including, binocular microscopes, diamand color masters, non-contact-optical measuring device, a wide range analytical techniques including FIR, UV-UIS-NIR, runam spectroscopy, and flucurescence analysis at various excitation wavelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation nor approval and by making the report IG does not agree to purchase or replace the article.
