This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laerscribed's by International Germological Institute (LGD). A LGb has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being mon-made (a manufactured product). LGDs are hyplacially produced by CVD (chemical vapor deposition) or by HPHI (high pressure high temperature) growth processes and may include post growth madifications to change the color. Gla titilizes the most advanced techniques and equipment currently available including, binacular microscopes, didmand color masters, non-contact-optical measuring device, a wide range analytical techniques including. FIRI, UV-VIS-NIB, cmann spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation or appraisal and by malking the report list does not gare to such case or scribe the article.
