Comments: As Grown - No indication of post-growth treatment.

This Laboratory Grown Diamond was created by High Pressure High

Temperature (HPHT) growth process.

Type II

Faint Blue

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesracited® by International Gemological Institute (LGD). A LGD has assentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vipor deposition) or by IPHIT (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGL titilizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIRI, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation or caparistical and by making the report IGL does not gree to purchase or reposite the article.
