Commonts: This Laboratory Grown Diam	and was created by Chamical Vapor

Comments: This Laboratory Grown Diamond was created by Chemical Vapor Deposition (CVD) growth process and may include post-growth treatment. Type IIa

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological institute (GN). A LGD has essentially the chemical, physical and optical properties as a mined atomond, with the exception of being mam-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by IHPIT (high pressure high temperature) growth processes and may include post growth modifications to change the color. IcI utilizes the mest advanced techniques and equipment currently available including, binocular microscopes, aliamand color matters, non-contoc-optical measuring device, a wide range analytical techniques including. FIIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation or approval and by making the report IGI does not agree to purchase or replace the article.
