I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation. I.OX magnification, corrected inipied louge, binocular microscope, master color comparison stones, non-contact-optical instruments and/or processes as deemed appropriate by I.G.I. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.
