LABORATORY GROWN DIAMOND REPORT

Comments: As Grown - No indication of post-growth treatment.

This Laboratory Grown Diamond was created by High Pressure High

nor appraisal and by making the report IGI does not garee to purchase or replace the article.

This Laboratory Grown Diamond was created by High Pressure High		
Temperature (HPHT) growth process. Type II		

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Lassrscheal® by International Gernological Institute (IG). I 4G has assentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vopor deposition) or by HPHI (high pressure high temperature) growth processes and may include post growth madifications to change the coinc. (IG utilizes the most advanced techniques and equipment currently available including, binocular microscopes, including FIIR, UV-VIIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelenaths. This Report Includes advanced security features. This Report is netter a auranney valuation
