This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesrscribed® by International Gemological institute (GN). A LGD has essentially the chemical, physical and optical properties as a minaed aliarond, with the exception of being mam-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by IHPIT (high pressure high temperature) growth processes and may include post growth modifications to change the color. (GI utilizes the most advanced techniques and equipment currently available including, binocular microscopes, admand color masters, non-contact-optical measuring device, a wide range analytical techniques including. FIIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation or opprosal and by making the report IG does not agree to purchase or replace the article.
