IGI LABORATORY GROWN DIAMOND ID REPORT

06/30/2021 IGI Report Number LG480171581

ROUND BRILLIANT

4.48 - 4.52 X 2.84 MM

Carat Weight	0.36 CARAT
Color Grade	E
Clarity Grade	SI 1
Cut Grade	VERY GOOD
Polish	EXCELLENT
Symmetry	VERY GOOD
Fluorescence	NONE
Inscription(s)	LABGROWN IGI LG480171581

Comments: As Grown - No indication of post-growth treatment. This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II

Temperature (HPHT) growth process.	

Type II

Comments: As Grown - No indication of post-growth treatment. This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by international Gemological Institute (IGI). A LGD has essentially the chemical, physical and optical proceities as a mined diamond, with the exception of being man-made (a manufactured product).

cofficial properties as a mined diamond, with the exception of being man-made (a monufactured product). LCGs are typically produced by CVD (chemical vapor departion) or by HPI (high pressure high temperature) growth processes and may include post growth modifications to change the color. Glo utilizes the most advanced techniques and equipment currently available including, binocutar microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, UV-man spectroscopy, and flucorescopes and value scription wavelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report IGI does not agree to purchase or replace the article.
