The laboratory grown diamond described in this Report ('Report') has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). (G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation. 10X magnification, corrected implet loupe, binacular microscope, master color companison stones, non-contact-optical measuring device, Diamond Sure¹⁴, Diamond View¹⁴. Spectraphotometer and such other vanced security features. A duly accredited gemologist of jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.
