This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Lasserstice#0% by International Gemological Intitule (GD). A LGD has sensifially the chemical, physical and aprical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) growth processes and may include post growth modifications to change the color. (GI utilizes the most advanced techniques and equipment currently available including. Disocular microscopes, alamond color masters, non-contoct-ophical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, uranna spectroscopy, and fluorescence analysis at various excitation availangths. This Report Includes advanced security features. This Report is neither a guarantee, valuation or opprivation and by making the report IGI does not agree to pulsates or replaces the articles.
