#### **GRADING SCALES**

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physi-cal and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equip-ment currently available to I.G.I., including, without limitation. 10X magnification, corrected implet louge, binocular microscope, master color companion stones, non-contract-optical measuring device, Diamond Sue <sup>10</sup>, and the second store in the resolution and wanced security features. A duty accendent of jewine in the Report as using a spectra to the importance of and interrelationship between cut, color, clarity and carat
