The laboratory growdiamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man-made means. IGI's grading system includes the following characteristics: cut, color, clarity, carat weight, fluorescence, and inscription. The IGI grading system is different from the GIA system currently available to IGI, including, without limitation, 10X magnification, corrected-tuple loupe, binocular microscope, master color comparison stones, non-contact-optical instruments, and other equipment. IGI's grading system is based on the use of such instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE CONSULT THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE FOR THIS REPORT. INFORMATION REGARDING THESE LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGILABS.COM/LABREPORTDISCLAIMER
