This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laerscribad<sup>®</sup> by International Gemological Institute (IG). A LGD has essentially the chemical, physical and optical properties as a mined atomand, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPH (Thigh pressure high temperature) growth processes and may include post growth modifications to change the color. IGI utilizes the most advanced techniques and equipment currently available including. Dinocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analylical techniques including FHR, UV-VIS-NIR, UV-VIS-NIR, UV-VIS-NIR, UV-VIS-NIR, the report lG does and the archites excitation more approxisal and by making the report IGI does not agree to purchase or replace the articles.
