This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed[®] by International Gemological Initiute (IGA). L4G has essentially the chemical, bytiscial and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPI (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGI utilizes the most advanced techniques and equipment currently available including. Disocular microscopes, alamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, UV-vIS-NIR, UV-man spectroscopy, and fluorescope in selfter a guarantee, valuation nor oppraisal and by making the report IGI does not agree to putches or replace the articles.
