This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process.

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed[®] by International Gemological Institute (IG). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are tryolarly produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) growth processes and may include post growth modifications to change the color. (IG utilizes the most advanced techniques and equipment currently available including. Dinocular microscopes, diamond color masters, non-contoct-ophical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, UV-VIS-NIR, UV-NIS-NIR, Diversione available including and excitation wavelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report IGI does not agree to purchase or replace the articles.
