LABORATORY GROWN DIAMOND REPORT

GRADING SCALES

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physi-cal and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equip-ment currently available to I.G.I. including, without limitation. 10X magnification, corrected implet louge, binocular microscope, master color companion stones, non-contract-optical measuring device, Diamond Sue⁴⁴. Subcritching the laboratory of the transformation and wanced security features A duty accendited gemologist or jeweler can advice you with re-spect to the importance of and interrelationship between cut, color, clarity and caract

spect to the importance of and intertelationship between cut, color, clamy and card weight.
