The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). Laboratory grown diamonds are one of the same chemical, physical and optical properties as natural diamonds. IGI uses the same grading system (a and a+), and processes (a and a+), and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected viewing, ultraviolet light, infrared spectroscopy, Raman spectroscopy, and measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.
