This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserschede<sup>3</sup> by International Gemological Intitule (Gi) A LGD hes sessifially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HPI (high pressure high temperature) growth processes and may include post growth modifications to change the color. (Gi utilizes the most advanced techniques and equipment currently variable including. Linocular microscopes, alamond color masters, non-contract-optical measuing device, a wide range analytical techniques including FII, UV-VIS-NIR, uranna spectroscopy, and fluorescence analysis at various excitation availengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation or opprisolation dby making the report IGI does not dgree to purchase or replace the articles.
