Type II

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesarchized's pinternational Geomological Institute (LGD). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are hypically produced by CVD (chemical vapor deposition) or by HPHI (high pressure high temperature) growth processes and may include post growth modifications to change the color. Glutillizes the most advanced techniques and equipment currently variable including. binocular microscopes, and diamond color masters non-contact-optical measuring device, a wide range analytical techniques including. FIRI, UV-VIS-NIR, unman spectroscope, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by marking the report (ISI does not gare to take the article.
