IGI LABORATORY GROWN DIAMOND ID REPORT

03/08/2022

IGI Report Number LG515223781

PEAR BRILLIANT

6.71 X 4.45 X 2.77 MM

Carat Weight	0.50 CARAT
Color Grade	н
Clarity Grade	VS 1
Polish	EXCELLENT
Symmetry	EXCELLENT
Fluorescence	NONE
Inscription(s)	LABGROWN IGI
	LG515223781
Comments: As Gro	wn - No indication

of post-growth treatment. This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II

Comments: As Grown - No indication of pos This Laboratory Grown Diamond was created	

This Laboratory Grown Diamond was created by High Pressure High Temperature (HPHT) growth process. Type II

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed[®] by International Gemological Initiute (IGA). L4G has essentially the chemical, bytiscial and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPI (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGI utilizes the most advanced techniques and equipment currently available including. Disocular microscopes, alamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, UV-man spectorecopy, and fluorescence analysis at various excitation wavelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation or oppravisal and by making the report IGI does not agree to purchase or replace the articles.
