This taboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Lastercibed by international Gemological Institute (GI) A LGD has essentially the chemical, physical and optical properties as a mined damand, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) are by HHI (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGI utilizes the most advanced techniques and equipment currently available including, binocular mitoriscopes,
