This Laboratory Grawn Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (GI). A LGD has essentially the chemical, physical and optical properties as a mined alamond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) grawth processes and may include post grawth madifications to change the color. (GI utilizes the most advanced techniques and equipment current) vanidible including, binocular microscopes, alamond color masters, non-contact-optical measuing device, a wide range analytical techniques including FITR, UV-1IS-NR, Uv-11S-NR, Uv-11S-NR, the second material vanises excitation wavelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report IGI does not agree to purchase or replace the articles.
