This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Lassracticed® by International Genological Initiute (GD). A LGD has essentially the chemical, physical and optical properties as a mimed diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) growth processes and may include post growth modifications to change the color. (GI utilizes the most advanced techniques and equipment currently variable including. Iniccular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, UV-VIS-NIR, UV-NIS-NIR, man spectroscopy, and fluorescoper is neither a guarantee, valuation nor appraids and by making the report (G) does not gree to purchase or replace the article.
