This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed⁹ by International Gemological Institute (GA). LGD has sessifially the chemical, physical and aplical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) growth processes and may include post growth modifications to change the color. [GI utilizes the most advanced techniques and equipment currently available including. Linocular microscopes, alamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-UIS-NIR, UV-man spectroscopy, and fluorescence analysis at various excitation availangths. This Report Includes advanced security features this Report is neither a guarantee, valuation or opprisida and by making the report [GI does not dgree to purchase or replace the article.
